

05 December 2011

To whom it may concern

As regards to the moving of UTI Data centre, Server; IT and populated Racks,

Move-IT relocations, responsible for the removing, transport and repositioning of equipment, have drawn a satisfactory result.

The supervision, equipment, and punctuality, as well as quality, were all on excellent standards.

We can recommend Move-IT to any nerve sensitive data centre department.

Comments from the business unit manager UTI Worldwide

Excellent, well done to everyone who assisted in making this a success!

Regards,

Stefaan Basson

I have confirmed with HCL that the move seems to have been successful and all is working fine.

Please don't hesitate to contact me should you have any queries or concerns.

Regards

Greg Wilkins
